

Paul Mann 58

Paul Mann Custom Boats recently announced the splash of their latest custom build, the 58-foot *Alina*. The result of the collaborative design effort between the Paul Mann team and *Alina's* owner is one of the most comfortable and capable custom sportfishing yacht in her class. She's based in Aruba, where she'll fish the hottest destinations in the Caribbean year-round.

She features a three-stateroom, two-head layout and is powered by Cat C18 engines which allow her to achieve a cruise of 28 knots and 66 gph and a top end of 35.8 knots and a 92.3 gph fuel burn even when completely loaded for travel. Her fuel capacity is 1,354 gallons and she holds 275 gallons of fresh water.

Alina's interior features cherry veneers and hardwoods with a stunning satin finish along with granite countertops throughout the boat. But when you open the carpeted and well-lit rod locker, you'll understand *Alina's* real function: to be one of the finest sportfishing boats on the water.
